

## **What's Happening in the 888**

### **Bungay School Campus Update**

**We know there has been a lot of discussion about the potential upgrades to the Seymour High School Pool and Gymnasium in recent days. While no one is denying that the improvements there are much needed, we also have been working on a plan to address the need for improvements and updating at Bungay School.**

**Back in August, we created a Bungay School Needs Assessment Committee to review the existing condition of the school and to establish a plan to upgrade the school. The Board of Selectpersons is scheduled to hear from the Committee in November and receive a report on their findings and what needs to be done. We know HVAC upgrades are needed, as Bungay is the only school currently without full AC. Once we hear from the Committee, we will take the necessary steps to move forward in creating a plan that best addresses the outstanding needs of the school. Please know that Bungay School improvements are a priority. If all goes to plan, our goal would be to address both projects under on school construction grant.**
