10. Building Maintenance – Great Hill – downstairs is temporarily closed. Town hired an inspector to measure moisture samples and make recommendations. It is likely they will have to get rid of fabric furniture and disinfect all hard surfaces. After that the space can be occupied. The suspended ceiling panels and an area by ice machine room is wet with black mold. Looking into demoing that area. When working on the ceiling panels there is a procedure that needs to be done. It is likely the space can be used for the Christmas party and then move forward with the ceiling issue.
    Citizens Engine- Leaky toilet got fixed. Working to get Commissioner Calzones town email to work so he can input building requests into the system.
